AGRICULTURAL DISTRICT REVIEW PROFILE (Updated Jan. 2010)

DISTRICT IDENTIFICATION

County:		District No.:	
Ontario		9	
Town(s) in District:			
Bristol, Canadice, Canandaigua, T. Naples, V. Naples Richmond, S. Bristol,			
No. acres in district: 17,401	No. acres in farms: ¹ 9,195	No. acres owned by farmers: 6,296	No. acres rented by farmers: 2,899

AGRICULTURAL DATA ANALYSIS

A.	Since last review, number of acres in District	Added: <u>1,006</u>	Deleted: 118
B.	Since last review, number of acres in farms	Increased: <u>1,006</u>	Decreased: <u>2</u>

¹ Number of acres in farms represents the sum of acres owned by farmers and rented by farmers.

**NEW YORK STATE
DEPARTMENT OF AGRICULTURE AND MARKETS**

**State Environmental Quality Review
SHORT ENVIRONMENTAL ASSESSMENT FORM
For UNLISTED ACTIONS Only**

PART I – PROJECT INFORMATION

1. The proposed action is located in the **County of Ontario** and the **Town(s) of Bristol, Canadice, Canandaigua, Naples, Richmond, South Bristol, and the Village of Naples**
2. The agency responsible for preparing this Short Environmental Assessment Form and determining environmental significance is the County Legislative Body of Ontario County.
3. The name and address for the Clerk of the above named County is _____
Karen DeMay, Ontario County Municipal Building, 20 Ontario St., Canandaigua, NY 14424.
4. Is this an application to modify an existing agricultural district? **YES**
 - If yes, what is the total number of acres comprising the district as it exists prior to modification?
Acres: 16,544
5. If this application involves a modification, will such modification result in a change in the size of the district? **YES**
 - If yes, how many acres are involved in the change?

Ag. District 9 Proposed Changes	2008 Additions		2008 Subtractions	
	Parcel Count	Acres	Parcel Count	Acres
Town of Bristol	1	51	-	-
Town of Naples	13	806	4	106
Town of Richmond	1	43	-	-
Town of South Bristol	3	98	3	11
Village of Naples	1	8	1	1
Totals:	19	1,006	8	118

- Does this represent an **Increase: Proposed new total is 17,401 acres**
6. Zoning and Planning Information
 - Does the agricultural district correspond with a town(s) zoning district(s)?
Yes

If Yes, please cite the applicable zoning district(s): **See table.**

 - Is/are the zoned district(s) within the modified agricultural district compatible with the goals and objectives of the Agricultural Districts Law, as set forth in Article 25-AA of the Agriculture and Markets Law? **Yes**

- If Yes, please cite the applicable language:

7. What is present land use in the vicinity of the proposed modification? **See below**

Residential Industrial Commercial Agriculture Park/Forest/Open Space Other

8. Is there a public controversy related to this district proposal?

None to date.

9. Attach any additional information as may be needed to clarify the proposed action.

I CERTIFY THAT THE INFORMATION PROVIDED ABOVE IS TRUE TO THE BEST OF MY KNOWLEDGE

Authorized signature: _____

Date: _____

PART II– DRAFT ENVIRONMENTAL ASSESSMENT

General Information

In providing responses to each of the questions, the reviewer should keep in mind that the action proposed is the modification or termination of an agricultural district or districts. The action is not the land use or activity which will, or may, take place in the district(s). For example, it is not appropriate to consider the effects of management action that may be taken by individual operators in conducting farming. Agricultural farm management practices, including construction, maintenance and repair of farm buildings, and land use changes consistent with generally accepted principles of farming are listed as Type II actions in 6 NYCRR §617.5(c)(3), and these actions have been determined not to have a significant impact on the environment.

- A. Does action exceed any Type I threshold in 6 NYCRR, Part 617.4? **No**

If Yes, coordinate the review process and use the FULL EAF.

- B. Will action receive coordinated review as provided for Unlisted actions in 6 NYCRR, Part 617.5?

Yes

If No, a negative declaration may be superseded by another involved agency.

- C. Could action result in any adverse effects associated with the following:

C1. Existing air quality, surface or groundwater quality or quantity, noise levels, existing traffic patterns, solid waste production or disposal, potential for erosion, drainage or flooding problems? Explain briefly:

No

C2. Aesthetic, agricultural, archaeological, historic or other natural or cultural resources; or community or neighborhood character? Explain briefly:

No. The land proposed for inclusion in the district is currently in areas that are in primarily in woodland or agricultural land use thereby not resulting in any change in neighborhood character.

C3. Vegetation or fauna, fish, shellfish or wildlife species, significant habitats, or threatened or endangered species? Explain briefly:

No

C4. A community's existing plans or goals as officially adopted, or a change in use or intensity of use of land or other natural resources? Explain briefly:

No. Agriculture is an allowable land use in all the zoning districts where land is proposed for inclusion.

C5. Growth, subsequent development, or related activities likely to be induced by the proposed action? Explain briefly:

No

C6. Long term, short term, cumulative, or other effects not identified in C1-C5? Explain briefly:

No

C7. Other impacts (including changes in use of either quantity or type of energy)? Explain briefly:

No

D. Will the project have an impact on the environmental characteristics that caused the establishment of a CEA? **No**

E. Is there, or is there likely to be, controversy related to potential adverse environmental impacts?

No

If Yes, explain briefly

PART III- DESIGNATION OF LEAD AGENCY

Please indicate desire for lead agency status by checking the appropriate box below:

X Since the proposed action will be undertaken by this County Legislative Body and since any adverse environmental impacts will be primarily of local significance, it is hereby recommended that this County Legislative Body serve as lead agency to ensure compliance with the requirements of the State Environmental Quality Review Act. It has been determined that the only other agency required to undertake an action in this case is the Department of Agriculture and Markets.

The County Legislative Body does not choose to nominate itself to serve as lead agency.

PART IV - DETERMINATION OF SIGNIFICANCE

INSTRUCTIONS: For each adverse effect identified above, determine whether it is substantial, large, important or otherwise significant. Each effect should be assessed in connection with its (a) setting (i.e., urban or rural); (b) probability of occurring; (c) duration; (d) irreversibility; (e) geographic scope; and (f) magnitude. If necessary, add attachments or reference supporting materials. Ensure that explanations contain sufficient detail to show that all relevant adverse impacts have been identified and adequately addressed. If question D of Part II was checked yes, the determination and significance must evaluate the potential impact of the proposed action on the environmental characteristics of the CEA.

Check this box if you have identified one or more potentially large or significant adverse impacts which **MAY** occur. Then proceed directly to the FULL EAF and/or prepare a positive declaration.

X Check this box if you have determined, based on the information and analysis above and any supporting documentation, that the proposed action **WILL NOT** result in any significant adverse environmental impacts **AND** provide on attachments as necessary, the reasons supporting this determination:

Name of Lead Agency

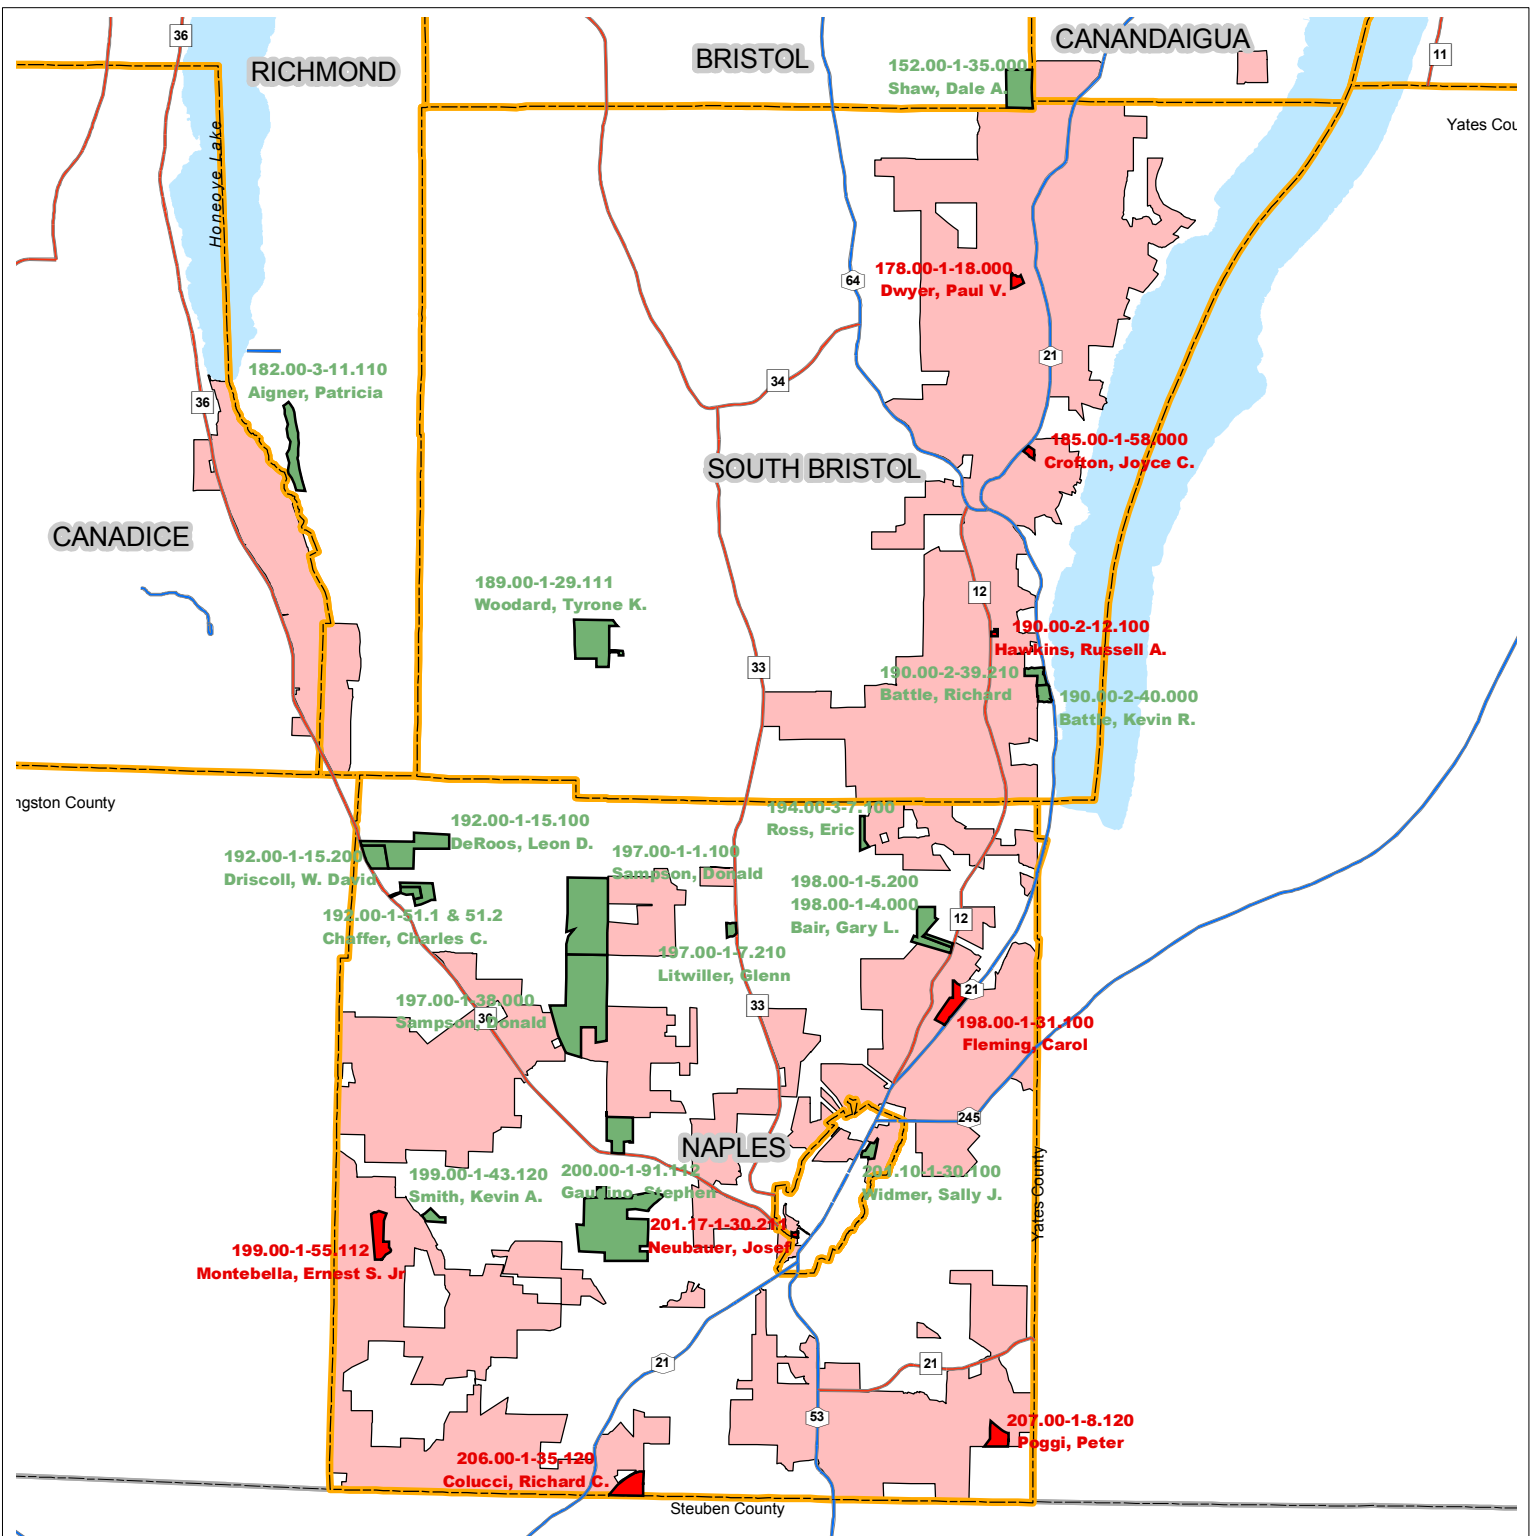

Print or Type Name of Responsible Officer in Lead Agency

Title of Responsible Officer

Draft

History of Agricultural District 9

Today's Agricultural District 9 is a consolidation of Agricultural Districts 9 and 10 which took place in 1999. The original Agricultural District 9 was established in 1981 and contained 6,240 acres. It was located in the towns of Naples, South Bristol and Canandaigua -- 96% of the land was in the Town of South Bristol.

The original Agricultural District 10 was established in 1982 and contained 7,533 acres located in the Town of Naples with some land in the Village of Naples.

After the 1999 consolidation, the Agricultural District 9 Report stated that 14,086 acres were included in the district. For reasons explained in the endnote, 16,544 acres is used as the 'starting' number since the additions and exclusions are based on current data sets.¹

Agricultural District 9 Summary Statistics

Table 1 Ag. District 9 Proposed Changes	2009 Additions		2009 Subtractions	
	Parcel Count	Acres	Parcel Count	Acres
Town of Bristol	1	51	-	-
Town of Naples	13	806	4	106
Town of Richmond	1	43	-	-
Town of South Bristol	3	98	3	11
Village of Naples	1	8	1	1
Totals:	19	1,006	8	118

Table 2 Ag. District 9 Acreage in Municipalities	Total Town Acreage	Total Acres in Ag Dist 9	% In Ag Dist 9
Town of Bristol	23,450	53	0.2%
Town of Canadice	20,551	842	4.1%
Town of Canandaigua	39,807	175	0.4%
Town of Naples	21,432	9,849	46.0%
Town of Richmond	28,350	293	1.0%
Town of South Bristol	26,888	6,263	23.3%
Village of Naples	614	161	26.2%
Total	161,092	17,636	10.9%

Municipalities Included in the Report

The towns of Naples and South Bristol, and the Village of Naples contain 92% of the land in the District. This report will contain statistics for all localities but the land use review will be limited to the town and village of Naples and South Bristol since they were addressed in the Agricultural District 1 review.

A Unique Agricultural Landscape

In other parts of the County, the glaciers left vast stretches of gently rolling prime farmland. In southern and southwestern Ontario county, the glaciers left a more rugged landscape interspersed with productive agricultural lands.

- Most of the District lies in the heart of the Bristol Hills which was created by glaciers thousand of years ago. The Bristol Hills are characterized by steep slopes, ravines and glens interspersed with areas of agricultural soils.
- The southern half of Naples forms the beginning of the Alleghany plateau with rolling hills covered in woodlands broken up by farm fields

Agricultural Soils ²

Unique soil types and microclimates created by proximity to Canandaigua Lake create excellent grape growing conditions. Other areas were particularly well suited for hay production and pasturing animals or raising row crops (corn, wheat, oats, soy beans, etc).

Seventy-five percent of the soils in the District are classified as “Soils of Statewide Significance” which means that while they do not meet the U.S. Department of Agriculture definition of “Prime”, when managed properly, they have unique properties that are important to agriculture in New York. Soils suitable for grapes generally fall into this category.

Table 3. Acreage of Important Agricultural Soils in Agricultural District 9									
Municipality	Prime		Prime if Drained		Statewide		None		Grand Total
Town of Bristol		0%		0%	13	25%	40	75%	53
Town of Canadice	78	9%		0%	38	5%	726	86%	842

% of Total Important Agricultural Soils		23%		2%		75%			

Agricultural Land Use

Given this diverse landscape, the District supports a wide diversity of agricultural activities including small dairies, vineyards, fruits and vegetables, hay, poultry, sugar bushes, Christmas trees, row crops, pasture land, and livestock operations. A single parcel may accommodate a pasture, vineyard, and woodland. The numbers below are a general characterization of agricultural land use.

The information provided in Table 3. is an estimate based on various data sources ³. There are also Christmas tree farms, sugar bush/maple syrup operations, and small dairies but specific data is not currently available.

Table 4. Agricultural Land Use in all Ag. 9 Municipalities	Acreage
Productive Ag Land	1,473
Livestock	396
Field Crops	1,577
Other Fruits	4
Orchard Crops	352
Poultry & Products	33
Vineyard	841
Sugar bush	Not known
Christmas Trees	Not known
Flower/Herb Farm	2

Farmland Ownership Patterns

There are 17,401 acres in Agricultural District 9.

Estimating the amount of land owned by a farmer or rented by farmers is difficult in Agricultural District 9 since there are many owners of many small parcels.

Based available data, seventy-two percent (72%) of farmland is estimated to be farmer owned. Not enough information was available to estimate whether a landowner intends to sell for non-agricultural use.

Approximately 8,095 acres are either owned or rented by farmers; 5,859 acres are owned by farmers and 2,236 acres are rented.

Issues and Trends in Agricultural District 9

Diversification vs. Consolidation

Ownership patterns in this district are trending in the opposite direction from other parts of the County. In other parts of the county the size of agricultural operations are increasing and the number of farmers are decreasing. The opposite is true here.

As an example, Table 5 provides a very simplified comparison of land ownership patterns between the Towns of Naples and Seneca. The estimated total number of individual parcel owners plus farm operators/families who own multiple parcels equals the number of owners/operators. (Smith owns only 1 parcel + Acme Farms owns 10 parcels= 2 owner operators.)

Table 5. Farmland Ownership Comparison	Acres in Agriculture	Number of Parcels in Agriculture	Number of Owners/ Operators
Town of Seneca	23,479	979	116
Town of Naples	4,328	173	72

Small is Becoming Beautiful

For much of the 20th century, Widmer Wine Cellars, Inc. played a dominant role as both an owner of farmland and vineyards, and as purchaser of juice from individual farmers. As Widmer became part of larger corporations, their processing facility no longer used the quantity of locally grown grapes. Constellation Brands, Inc. announced in 2009 that it would be closing the Naples processing plant and moving operations to Canandaigua. Previously, they had cancelled contracts with local growers who still provided them product.

The loss of Widmer has had a profound impact on the area. A different paradigm is emerging - one which is not dependent on one business. The area is attracting individuals who are starting second careers as operators of small-scale or specialty farms. Long time farmers have also adapted to this trend and have diversified their operations. (Ontario County Cooperative Extension prepared a report summarizing agricultural products that are well-suited to this area.)

The fragmented agricultural landscape of the area is well-suited to these kinds of operations. Based on the results from the Agricultural District Review Worksheet, the landowner meeting and the ownership data, the typical farm operation is about 50 acres in size, may have multiple activities (vineyard, animals, pasture, small fruits) and is currently grossing up to \$50,000 in farm sales.

The closing of the Widmer facility also presents significant opportunities for adaptive reuse as well as restoring productivity to their agricultural lands that have been underutilized in recent years.

'Small' Has Different Needs

- New 'farmers' generally do not have college degrees in agriculture or have the experience gained by working on a farm. They are 'self taught', not necessarily networked into the local agricultural establishment, and look to institutions like Cooperative Extension for training and education.
- Everything from equipment needs to the purchase of inputs has not been scaled to the small operator. The national trend has been toward bigger, larger, consolidated one or two commodity operations.
- Small operators have to do it all: Growing, marketing, managing, purchasing, etc.

Location, Location, Location

- Within an hour's drive of Rochester, the Bristol Hills and Naples have long been a tourist destination and practically pioneered the concept of 'agri-tourism'. Visitors have been attracted to the beautiful landscapes with vineyards, woodlands, open fields and lake views. Jerome's U-Pick is one of the oldest 'agri-tourism destinations in the state providing the public with 'hands on' experience of picking strawberries, raspberries, and grapes.
- Due to the increase in "Buying Local", visitors are increasingly interested in 'buying local' and are becoming customers of small livestock operators and specialty crop producers.

Agriculture and Local Zoning and Land Use Planning

NYS DAM regulations for agricultural district review require an analysis of local planning and zoning regulations to assess their impact on agriculture. This review focuses on key provisions as indicators of “ag-friendliness”. As mentioned previously, this report will only address the Towns of Naples and South Bristol, and the Village of Naples

Town of Naples

Zoning

- The Agricultural-Conservation Zoning District has a strong Purpose statement in support of agriculture. It states... “Regulations are established to promote agricultural activities as the highest and best use of the land in the District as well as the natural environmental integrity of the lands with the District”
- The code sets a minimum required lot size for a farm is 10 acres. This is a problem since there are farm operations that do not meet the standard. The regulations also establish setback requirements for farm buildings. Fixed dimensional requirements can limit a farmer from efficiently using their land.
- The lot size for single family residences in the AG District is three acres. Lot size is also used to determine the number of units allowed on a parcel. For example, a 30 acre parcel could have 10 units. Such a density pattern is unlikely to occur given the lack of public infrastructure.

This standard also has the unintended consequence of fragmenting agricultural land with lots that are too small for agricultural production and too large to “mow”.

Subdivision Regulations

NYS Town Law Sec. 278 Clustering Provisions: This provision is a potentially powerful tool for both farmland owners and the planning board since it allows the necessary design flexibility needed to maintain viable agricultural lands.

The subdivision regulations allow the planning board to require an applicant to submit a “cluster” plan in if the Board finds that there are unusual site conditions, issues regarding neighborhood character, or existence of unique natural features. Though it does not mention agricultural land, it could be inferred that farmland is included since it is the defining feature of the Agricultural-Conservation District landscape.

- **Consideration of Agricultural Infrastructure** The regulations do not require consideration the impacts of a subdivision on the agricultural infrastructure of the parcel or on adjoining parcels. Infrastructure includes surface or subsurface drainage systems, equipment access points, lane ways, hedge rows, etc. Not accounting for these impacts can severely limit the viability of any remaining land on the subdivided parcel and adjoining parcels.

Town of South Bristol

Zoning

- Agriculture is an allowable use in all the areas included in the district.
- The Code also includes an Agricultural Overlay District. It states that if any provision of the local zoning code is in conflict with NYS Department of Agriculture and Markets regulations regarding agricultural land use, the conflict will be resolved in favor of the state regulations for parcels in the Agricultural District.
- Like the Town of Naples, the code allows large lots from one to five acres. This has the same consequences as described above.

Subdivision Regulations

- **NYS Town Law Sec. 278 Clustering Provisions** The regulations do not have a provision allowing NYS Town Law Section 278 Clustering. The zoning code allows for a Planned Unit Development (PD) which is considered clustering. A PD is an actual amendment to the zoning code by the Town Board.

The Sec. 278 provision, while not allowing a change in land use or increase in number of units, gives the planning board and the applicant design flexibility to protect important resources without requiring multiple area variances. It is a good tool for protecting viable farmland, minimizing conflicts with neighbors, and protection other important natural resources.

- **Consideration of Agricultural Infrastructure** The regulations do not require mapping of agricultural infrastructure such as surface or subsurface drainage systems, equipment access points, lane ways, or hedge rows on either the property being subdivided or the adjoining parcels whose agricultural viability may be adversely impact if they are disturbed.

Village of Naples

Zoning

The Land Conservation/Floodplain (LC) zoning allows agricultural uses. No residential uses are allowed which minimizes opportunities for land use conflicts. It does allow nonresidential structures but does not provide any definition or standards for them.

Subdivision Regulations

- **NYS Village Law Sec. 7-738:** The subdivision regulation do include a clustering provision and allow the planning board to require a cluster plan which will be useful if the Village ever changes the allowable land uses to include residential or commercial development.

Consideration of Agricultural Infrastructure: This is not addressed.

Planning Topics Applicable to all Three Localities

Local Comprehensive Planning

All the comprehensive/strategic plans of the three localities recognize agriculture as an important land use in their communities. It is considered essential in defining community character and maintaining the scenic quality that is important to the tourism industry and the residents.

Local Right to Farm Laws

None of the localities have local right to farm laws.

Local Agricultural Advisory Committees

None of the localities have advisory committees.

¹ It would be nice if data sets were compatible making comparisons easy and accurately do from review to review. Changing technology and data bases don't make literal number comparisons possible. Two data sources are used to generate the acreage statistics for the agricultural district reviews: 1) NYS Real Property Services (RPS), and, 2) Ontario County Geographic Information System (GIS). There are a number of factors that account for **the differences including** changes in technology, variations in parcel line measurements in the GIS, inclusion of road right-of-ways, and lot line adjustments that have taken place since 1999.

² **U.S. Department of Agriculture, National Resource Conservation Service. Farmland Classification (622.03)** <http://soils.usda.gov/technical/handbook/contents/part622.html>

(a) Definition

The farmland classification identifies map units as prime farmland, farmland of statewide importance, or farmland of local importance.

(b) Significance

Farmland classification identifies the location and extent of the most suitable land for producing food, feed, fiber, forage, and oilseed crops. This identification is useful in the management and maintenance of the resource base that supports the productive capacity of American agriculture.

Prime Farmland Soils (622.04)

(a) Definition

Prime farmland is land that has the best combination of physical and chemical characteristics for producing food, feed, forage, fiber, and oilseed crops and that is available for these uses. It has the combination of soil properties, growing season, and moisture supply needed to produce sustained high yields of crops in an economic manner if it is treated and managed according to acceptable farming methods. In general, prime farmland has an adequate and dependable water supply from precipitation or irrigation, a favorable temperature and growing season, an acceptable level of acidity or alkalinity, an acceptable content of salt or sodium, and few or no rocks. Its soils are permeable to water and air. Prime farmland is not excessively eroded or saturated with water for long periods of time, and it either does not flood frequently during the growing season or is protected from flooding. Users of the lists of prime farmland map units should recognize that soil properties are only one of several criteria that are necessary.

³ **Accounting For Agricultural Land Use** The agricultural landscape also impacts accurately characterizing how much land is in agricultural land use. Other Ontario County agricultural district review reports have used NYS Real Property Services data's Property Class Code to profile agricultural land use.

In this district with sharp changes in topography and soil types taking place in very small areas, a single parcel can be characterized by multiple land uses. One parcel may have a house and/or a vineyard, woodland and an abandoned field. The assessor must make a determination by the Assessor's Manual which code applies. If just the property class codes alone were used, only 33% of the parcels with active farming would be counted.

This report uses a composite of data from listings of parcels that receive the agricultural assessment and information obtained from landowners who attended the public information meeting.
