## SAFETY FIRST

As construction work on the project continues, remember construction flag personnel are at the mercy of the traveling motorist.

Use caution when approaching a construction work zone and follow their directives.

Your patience is greatly appreciated!

## CR 23/McIvor Road & Fort Hill Road

### INTERSECTION IMPROVEMENT PROJECT UPDATE

This is newsletter 2 describing the status of the CR 23/McIvor Road & Fort Hill Road Intersection Improvement Project

## PROJECT ORGANIZATION

Keeler Construction Co., Inc., (KCC) of Albion, New York, has been constructing the improvements at the CR 23/McIvor Road & Fort Hill Road intersection since the week of June 3, 2019.

The project is moving along well and the contractor has been on-site diligently working to complete the project. However, the wet weather earlier in the construction season, delays in getting the overhead utilities relocated out of the work limits, and a shortage of some granite curb materials have resulted in the project being behind schedule.

We now anticipate the intersection will be re-opened on September 27, 2019.

## What's happening now?

KCC and their sub-contractor's are constructing the Portland Cement Concrete (PCC) pavement.

Once the PCC pavement is complete and sufficiently cured in-place, KCC will complete the Hot-Mix Asphalt (HMA) top course pavement, pavement striping, street lighting, & open the intersection to vehicular traffic. We anticipate the intersection will be opened by the end of September.

Lawn & landscaping restoration and miscellaneous "clean-up" work will follow and should be completed by the end of October.

We thank you for your patience and ask that you keep focused on the end product.

## What's the work schedule?

KCC's plan for project construction is as follows:

- PCC Paving
- HMA Paving
- Street Lighting
- Pavement Striping
- Lawn & Landscaping Restoration

## Who do I contact with questions?

Ontario County Department of Public Works is overseeing construction of the entire project. Tim McElligott is Project Manager and Pete Van Buren is Resident Engineer on-site during construction.

Public Works staff can be reached at 585.396.4000.
